Installation manual of  
“Fit-Box” enclosure

**FBbmw26 BMW 5 F11**

I  
The housing is designed  
to be mounted in the  
luggage compartment on  
the left side

**CB**  
**BASEER**

||

The first step is to remove the glove box cover and relocate the factory amplifier. To do this, change the amplifier mounting location

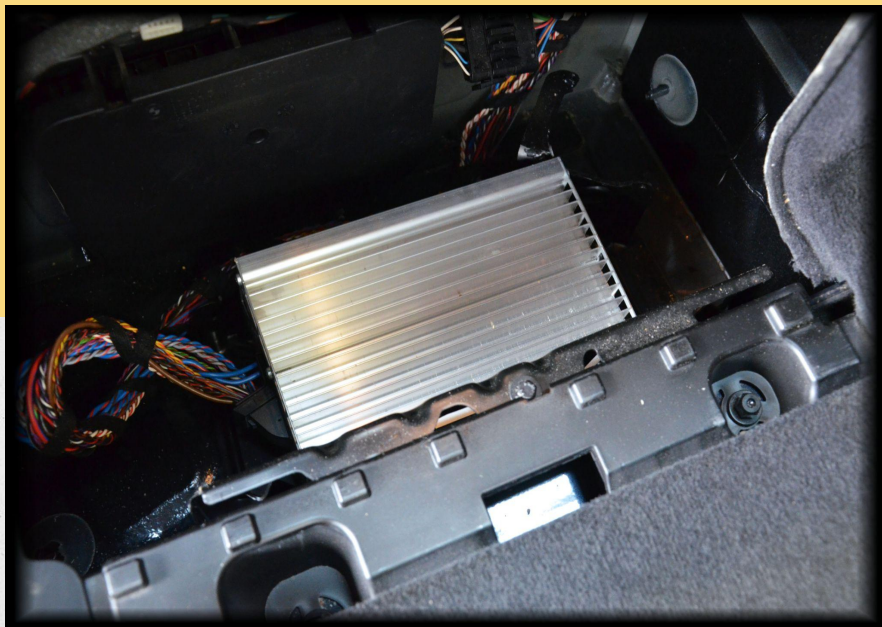

**CB**  
**BASER**

III

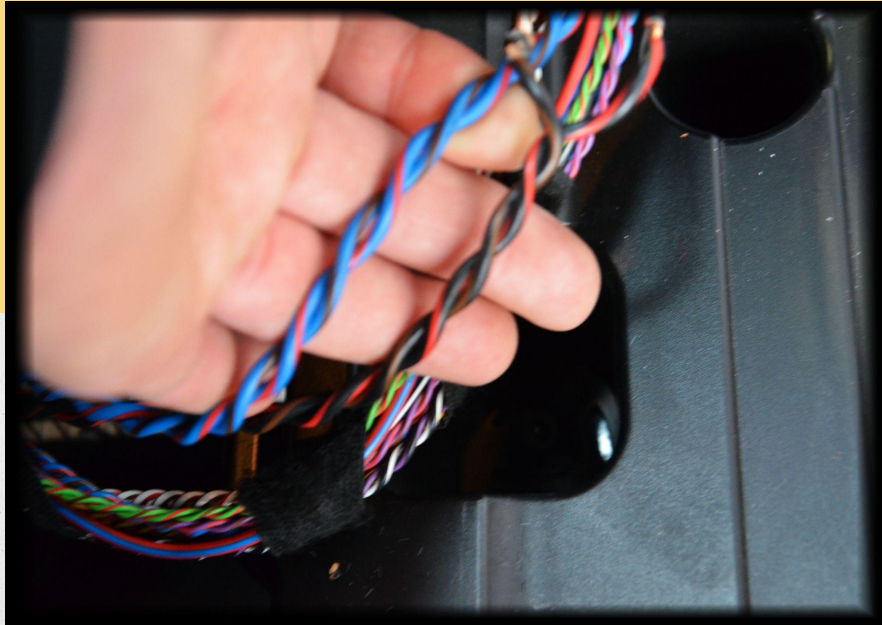

In our installation, the amplifier was moved to the bottom of the glove box. Thus, it will be covered by the loudspeaker housing

**CB**  
**BASEER**

#### IV

Cables that will be used  
to get the signal to the  
amplifier

**B**  
**BASEER**

**V**

In order to protect the housing against moving while driving, we recommend to fix it with an angle bar  
Angles are not included in the set

**CB**  
**BASEER**

**VI**

The housing is adjusted to the prepared recess, so that it does not protrude beyond the line of the trunk floor

**CS**  
**BAEYER**

## VII

Screw the previously prepared fixing element with the car upholstery to the housing

  
BAYER

**VIII**

Installation completed  
correctly
